MOHIT KUMAR

WEB DEVELOPER

PROFESSIONAL PROFILE

As a fresher computer science student, I have a strong foundation in programming and a passion for technology. I am eager to learn and grow as a developer and am constantly seeking out new opportunities to expand my skill set. With my dedication to learning and my enthusiasm for the field, I am well-equipped to succeed in a career in the tech industry.

PROJECTS

Portfolio

I created a portfolio using React JS, which allowed for efficient creation and management of the website's various elements. The site features dynamic routing for a seamless user experience, and the use of reusable components helped to keep the code organized and maintainable. I am very satisfied with the end result and believe that React JS was instrumental in the development of a professional and high-quality portfolio.

SocialCircle

I developed a social media application called SocialCircle using the MERN stack. The application allows users to create profiles, connect with friends, and share posts and photos. I utilized the scalability and flexibility of the MERN stack to build a responsive web application. Some notable features include changing of mode from light to dark. Overall, I am proud of the end result and believe that the use of the MERN stack was crucial in the successful development of SocialCircle.

Flappy Bird

I have created a flappy bird game using react js. In this game, the bird navigates through a series of pipes without colliding with them, and the bird is controlled by the player who can make it flip its wings by pressing it the game ends when the bird collides with a pipe or goes off the screen .

SKILLS

- HTML
- CSS
- Javascript
- JQuery
- Bootstrap
- Reactjs
- Expressjs
- MongoDB
